# INTRODUCTION

This list has been adapted from the list annually produced by the World Anti-Doping Association (WADA).

This list is revised annually via a combination of the annual WADA update and the continued advancement of testing practices.

The information provided below is for informational purposes only. The New Zealand Powerlifting United (NZPU), its staff and/or representatives are not qualified medical professionals and will not provide medical advice and/or respond to athlete inquiries regarding whether use of a particular medication or supplement not listed below is permissible.

All athletes intending to compete in NZPU-sanctioned drug-tested competitions bear the exclusive responsibility of consulting their own physician or medical professional to determine whether any prescription medications or other supplements they are currently using may yield a positive test result and/or contain any substances on this banned substance list.

Below are some terms used in this List of Prohibited Substances and Prohibited Methods.

## ***Prohibited In-Competition***

Subject to a different period having been approved by the NZPU, the In-Competition period shall in principle be the period commencing at 11:59 p.m. on the day before a Competition in which the Athlete is scheduled to participate until the end of the Competition and the Sample collection process.

## ***Prohibited at all times***

This means that the substance or method is prohibited In- and Out-of-Competition at all times.

## ***Specified and non-Specified***

All Prohibited Substances shall be Specified Substances except as identified on the Prohibited List. No Prohibited Method shall be a Specified Method unless it is specifically identified as a Specified Method on the Prohibited List. The Specified Substances and Methods identified in this document should not in any way be considered less important or less dangerous than other doping substances or methods. Rather, they are simply substances and methods which are more likely to have been consumed or used by an Athlete for a purpose other than the enhancement of sport performance.

## ***Substances of Abuse***

Substances of Abuse are substances that are identified as such because they are frequently abused in society outside of the context of sport. The following are designated Substances of Abuse: cocaine, diamorphine (heroin), methylenedioxymethamphetamine (MDMA/"ecstasy"), tetrahydrocannabinol (THC).

**PROHIBITED AT ALL TIMES (IN-AND-OUT-OF-COMPETITION)**
